HEARING RESEARCH

Vol. 112, Nos. 1–2
October 1997

CONTENTS

Cited in: Biological Abstracts (BIOSIS); Chemical Abstracts; Current Contents/Life Sciences; Current Awareness in Biological Sciences (CABS); Excerpta Medica (EMBASE); Index Medicus; INSPEC; PASCAL M; Reference Update

Research Papers

S. Pieke-Dahl, K.K. Ohlemiller, J. McGee, E.J. Walsh and W.J. Kimberling (USA)
Hearing loss in the RBF/DnJ mouse, a proposed animal model of Usher syndrome type IIa 1

T. Yamasoba and D.F. Dolan (USA, Japan)
Chronic strychnine administration into the cochlea potentiates permanent threshold shift following noise exposure 13

A.M. Pantoja, J.C. Holt and P.S. Guth (Colombia, USA)
A role for chloride in the suppressive effect of acetylcholine on afferent vestibular activity 21

P. Franz, S. Aharinejad, A. Miksovsky, D.E. Schraufnagel, E.K. Larson and S.C. Marks Jr. (Austria, USA)
Endothelin-1 causes luminal constrictions in rat cochlear veins 33

B. Ryals, E. Westbrook and J. Schacht (USA)
Morphological evidence of ototoxicity of the iron chelator deferoxamine 44

D.L. Kirk and R.B. Patuzzi (Australia)
Transient changes in cochlear potentials and DPOAEs after low-frequency tones: the 'two-minute bounce' revisited 49

D.L. Kirk, A. Moleirinho and R.B. Patuzzi (Australia)
Microphonic and DPOAE measurements suggest a micromechanical mechanism for the 'bounce' phenomenon following low-frequency tones 69

T. Ren, A.L. Nuttall and J.M. Miller (USA)
ATP-induced cochlear blood flow changes involve the nitric oxide pathway 87

H.-J. Park, A.S. Niedzielski and R.J. Wenthold (USA)
Expression of the nicotinic acetylcholine receptor subunit, $\alpha 9$, in the guinea pig cochlea 95

M. Sadanaga, J. Liu and P. Wangemann (USA)
Endothelin-A receptors mediate vasoconstriction of capillaries in the spiral ligament 106

R. Hartmann, R.K. Shepherd, S. Heid and R. Klinke (Germany, Australia)
Response of the primary auditory cortex to electrical stimulation of the auditory nerve in the congenitally deaf white cat 115

Y. Liu, D. Rao and L.D. Fechter (USA)
Correspondence between middle frequency auditory loss in vivo and outer hair cell shortening in vitro 134

L.J. White and R.P. Carlyon (UK)
Detection of signals having expected and unexpected temporal structures 141

M. Tykocinski, R.K. Shepherd and G.M. Clark (Australia)
Reduction in excitability of the auditory nerve following electrical stimulation at high stimulus rates. II. Comparison of fixed amplitude with amplitude modulated stimuli 147

W.E. O'Neill, M.L. Zettel, K.R. Whittemore and R.D. Frisina (USA)
Calbindin D-28k immunoreactivity in the medial nucleus of the trapezoid body declines with age in C57BL/6, but not CBA/CaJ, mice 158

Contents continued on inside back cover

0378-5955(199710)112:1/2;1-O

(Contents continued from back cover)

Y. Zheng, K. Ohyama, K. Hozawa, H. Wada and T. Takasaka (Japan)
Effect of anesthetic agents and middle ear pressure application on distortion product otoacoustic emissions in the gerbil 167

S. Sugimoto, M. Sakurada, J. Horikawa and I. Taniguchi (Japan)
The columnar and layer-specific response properties of neurons in the primary auditory cortex of Mongolian gerbils 175

S.J. Kim and S.K. Juhn (South Korea, USA)
Two types of K^+ currents in marginal cells cultured from rat stria vascularis 186

P. Hofstetter, D. Ding, N. Powers and R.J. Salvi (USA)
Quantitative relationship of carboplatin dose to magnitude of inner and outer hair cell loss and the reduction in distortion product otoacoustic emission amplitude in chinchillas 199

K. Parham (USA)
Distortion product otoacoustic emissions in the C57BL/6J mouse model of age-related hearing loss 216

J.M. Sinnott, S.L. Street, K.W. Mosteller and T.L. Williamson (USA)
Behavioral measures of vowel sensitivity in Mongolian gerbils (*Meriones unguiculatus*): effects of age and genetic origin 235

B.E. Pfingst, T.A. Zwolan and L.A. Holloway (USA)
Effects of stimulus configuration on psychophysical operating levels and on speech recognition with cochlear implants 247

Calendar of Events 262

Instructions to Authors 264

Author Index Volume 112 267

Subject Index Volume 112 269

The table of contents of *Hearing Research* is included in ESTOC – Elsevier Science Tables of Contents service – which can be accessed on the World Wide Web at the following URL addresses:
http://www.elsevier.nl/locate/estoc or http://www.elsevier.com/locate/estoc

A CUMULATIVE INDEX for *Hearing Research*, Volumes 1 through to the current volume is available on the Internet: gopher://spib.rice.edu:70/11/SPIB/bibliography/hr

SUBMISSION PROCEDURE Please submit your manuscript plus three copies of all items including figures (a total of **four** original sets of micrographs should be submitted) and tables to:

Professor Aage Møller
(Editor in Chief)
at the Editorial Office of Hearing Research
P.O. Box 99187
Pittsburgh
PA 15233-4187
USA

Address for courier services:
Cleat Szczepaniak
Editorial Office of Hearing Research
985 Ringgold Street
Pittsburgh
PA 15220
USA

Cleat Szczepaniak
(Editorial secretary)
Tel./Fax +1 (412) 920-1911
E-mail cleats+@pitt.edu
